*October 28, 2009*

**Dear Friends,**

**Kasupe Ministries is pleased to inform you that we have constructed two boreholes (deep water wells) in the village. The boreholes, funded by Europe Third World Association & Ashland Presbyterian Church, are located at Kasupe Kindergarten and Secondary School respectively. We have spent about \$7000 on each borehole. We praise God because part of the Kasupe community of about 4000 people will have access to clean water at least for the next 15 years. Below are some pictures of the boreholes.**

*The Secondary School Borehole: Kids from the surrounding community enjoying fresh and clean water from the borehole*

*These kids will use this borehole for the next 15 years (left); a washing slab near the borehole (right)*

*The drilling truck (with compressor) at work (left); women helping with the pipes during the construction of the Secondary School borehole(right). The compressor dug about 50 meters into the ground*

**Fletcher felling the water for the first time**

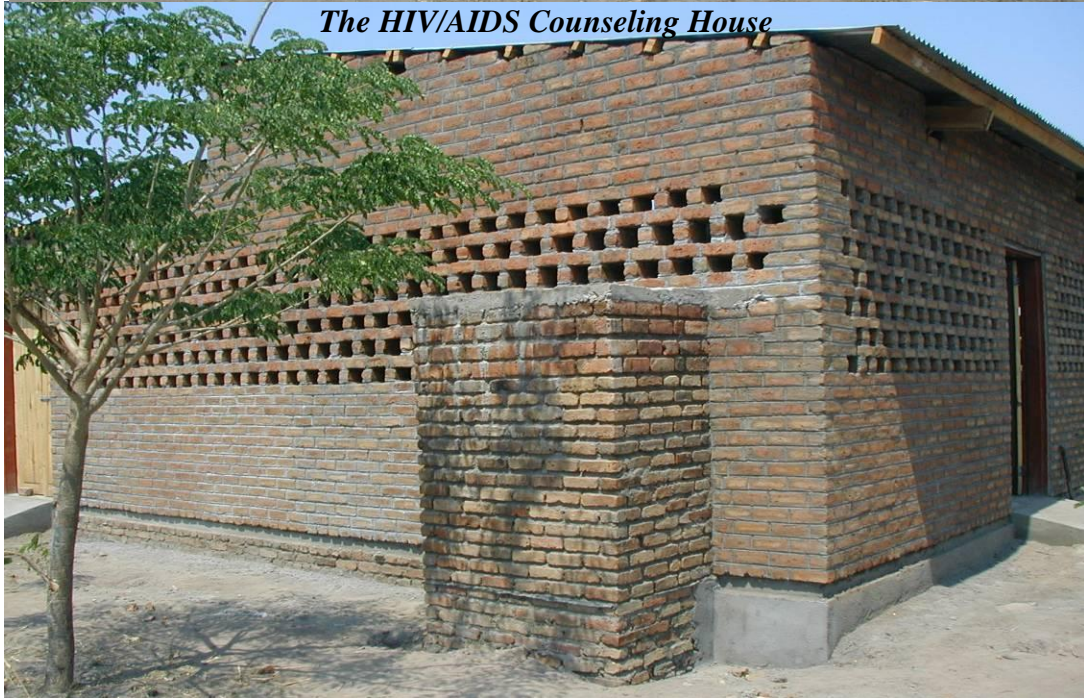

*The borehole at the Kindergarten means a lot to these women because their kids will no more suffer from water-borne diseases*

**We are also pleased to announce that Kasupe Ministries has finished the construction of the HIV/AIDS counseling building. The construction of this house is one of the activities that KM plans to undertake as we try to help the HIV positive people. The house will not only be used for HIV/AIDS testing and counseling, it will also serve as an under-five children clinic, as well as a prenatal clinic (as per government of Malawi's request). The construction work was funded and done by Guust Selhorst & Geraldine Vincent who came to from Spain in August 2009. Local people also helped in the project. We have spent about \$5000 to do this work. Below are some pictures of the house.**

*The HIV/AIDS Counseling House*

**Praise God for all these successes.**

*Prepared by:  
Fletcher Padoko, Executive Director.*
